

Garaventa Accessibility Evacu-Trac

emergency evacuation device

The Garaventa Evacu-Trac CD7 is an evacuation device used to move people with a disability or injury down stairways quickly and safely during an emergency. Evacu-Trac's patented speed governor and braking system allow a small attendant to easily evacuate a larger passenger.

Garaventa Evacu-Trac

The world's best evacuation chair just got better! The new Evacu-Trac CD7 is easy to use while providing the passenger with increased comfort and safety. The weight of the Evacu-Trac has been reduced by 27%. Turning clearances have also been reduced, making Evacu-Trac even easier to handle on small stairways. Highlighted below are some of the features of the new Evacu-Trac CD7:

Secondary Brake System

Although a governor controls the speed of descent, an additional mechanical brake is provided that will stop and hold Evacu-Trac on stairs. This secondary brake system also serves as a parking brake when Evacu-Trac is stopped on flat surfaces. The failsafe brake engages automatically when the attendant releases the brake lever.

Open Sides for Easy Transfer

Open sides and the low seating position make Evacu-Trac easy to load in an emergency. Many disabled passengers can transfer into Evacu-Trac without assistance, once Evacu-Trac has been opened.

Hydraulic Speed Governor

The hydraulic speed governor mechanically engages with the tracks to control the descent speed at a comfortable rate. The attendant guides the machine but is not required to exert any effort to control the speed.

Adjustable Safety Straps

Three adjustable safety straps, with quick release Velcro, securely hold passengers of various sizes, including children.

Auxiliary Wheels for Landings

Six auxiliary wheels allow the attendant to easily move Evacu-Trac across flat surfaces and around stairway landings.

Comfortable Seating Position

Evacu-Trac provides disabled passengers of various sizes with a comfortable seating position. The passenger's head, back, hips, legs and feet are well supported when descending the stairs and when parked after the evacuation.

Steel Reinforced Tracks

Rubber tracks with special saw-tooth lugs securely grip the stairway. Hundreds of steel wires molded into the tracks ensure track strength and durability. The long track length provides stability on the stairway.

Evacu-Trac Storage Cabinet

Protect your Evacu-Trac, as you would any other important life-safety equipment, by storing it in a steel storage cabinet located near the top of the stairway. Designed to hold a single Evacu-Trac, the storage cabinet includes graphics clearly identifying the contents and a quick-release strap for removal of Evacu-Trac during an emergency.

Storage Cabinet Dimensions:

Height..... 1177mm/46.3in
Width 534mm/21.0in
Depth 331mm/13.0in

Safe, reliable and fast emergency evacuation

In an emergency such as a fire or an earthquake, elevators should not be used. People with limited mobility may be trapped. Garaventa's Evacu-Trac CD7 provides a lifeline to safety.

During an emergency, the passenger is transferred from their wheelchair to the Evacu-Trac. Once positioned in the Evacu-Trac, velcro straps are wrapped securely around the passenger's torso and lower legs. The passenger is then wheeled to the stairway for descent.

During descent the passenger sits in a comfortable, upright position, securely held by three safety straps.

To turn the Evacu-Trac on flat surfaces, the attendant pushes down on the handle and pivots the unit on the rear auxiliary wheels.

When ready to descend the next flight, the attendant squeezes the Brake Release Bar to release the secondary, failsafe brake.

Evacu-Trac glides down hallways on six auxiliary wheels. When the stairway is reached, Evacu-Trac automatically lowers onto its rubber tracks for stairway descent.

Features

- Quick and easy set up for immediate use
- Carries up to 300 lbs.
- Passenger's weight moves unit down stairs, while the governor controls speed
- Failsafe brake brings unit to a complete stop automatically
- Adjustable safety straps
- Stable and self-supporting
- Unique seat design allows easy transfer from wheelchair
- Durable tracks grip stairs securely
- The tracks grip the stairs, regardless of the stair construction material

Benefits

- Provides quick and safe emergency evacuation
- No hand carrying of mobility impaired persons
- Small attendants can easily move heavier passengers
- Easily stores in a secure area when not in use
- Requires minimal maintenance
- Available immediately
